org/neo4j/kernel/impl/api/store/StoreAbstractNodeCursor.java

Revision 1	Revision 2
| ```java
package org.neo4j.kernel.impl.api.store;

public abstract class StoreAbstractNodeCursor
{
  @Override
  public Cursor<RelationshipItem>
relationships( Direction direction ) {
    return storeStatement
      .acquireNodeRelationshipCursor(
        nodeRecord.isDense(),
        nodeRecord.getNextRel(),
        nodeRecord.getId(), direction, null);
  }

  public Cursor<RelationshipItem>
acquireNodeRelationshipCursor( boolean dense,
long id, Direction direction, int[]
realTypes) {
    neoStore.assertOpen();
    return nodeRelationshipCursor
      .get().init( dense, nextRel, id,
        direction, relTypes );
  }
}
``` | ```java
package org.neo4j.kernel.impl.api.store;

public abstract class StoreAbstractNodeCursor
{
 @Override
  public Cursor<RelationshipItem>
relationships( Direction direction ) {
    return nodeRelationshipCursor
      .get().init(
        nodeRecord.isDense(),
        nodeRecord.getNextRel(),
        nodeRecord.getId(), direction, null);
  }

}
``` |
